

1 **VI. CLAIMS**

2

3 What is claimed is:

4

5 1. a clitoris stimulator, comprising:

6

7 A) electrically driven vibrating means; and

8

9 B) clip means for removable attachment to the vaginal labia of a
10 user, said clip means being mounted to said vibrating means so
11 that said vibrating means is kept in contact with the user's
12 clitoris.

13

14 2. The stimulator set forth in claim 1 wherein said clip means
15 includes fist and second spring biased arm members cooperatively
16 mounted to said vibrating means to provide sufficient gripping
17 action against predetermined areas of said vibrating means.

18

19

20 3. The stimulator set forth in claim 2 wherein said clip means
21 includes a rigid curved plate with a central portion, first and second
22 ends, said central portion being rigidly mounted to said vibrating
23 means and said first and second ends being kept at a spaced apart
24 relationship with respect to said vibrating means so that said first and
25 second arm members cooperate with said first and second ends to
26 provide sufficient grip action o a user's vaginal labia to keep said
27 stimulator in place.

28 4. A clitoris stimulator, comprising:

1

- 2 A) electrically driven vibrating means;
- 3
- 4 B) holder means for remobable receiving said vibrator means; and
- 5
- 6 C) clip means for removably attachment to the vaginal labia of a
- 7 user, said clip means being mounted to said holder means.

8

9 5. The stimulator set forth in claim 4 wherein said clip means

10 includes first and second spring biased arm members

11 cooperatively mounted to said vibrating means to provide

12 sufficient gripping action against predetermined areas of said

13 vibrating means.

14

15 6. The stimulator set forth in claim 5 wherein said clip means

16 includes a rigid curved plate with a central portion, first and second

17 ends, said central portion being rigidly mounted to said vibrating

18 means and said first and second ends being kept at a spaced apart

19 relationship with respect to said holder means so that said first and

20 second arm members cooperate with said first and second ends to

21 provide sufficient grip action on user's vaginal labia to keep said

22 stimulator in place.
